

CLAIMS

I claim:

1. A contoured gutter end cap, comprising:

a front wall having a top edge, a bottom edge, and a first and second side edge, said front wall being contoured to correspond to the contours of an attached gutter;

an end wall having a top edge, a bottom edge, a distal edge and a proximal edge, said end wall being contoured to correspond to the contours of an attached gutter;

a back wall having a top edge, a bottom edge, and a first and second side edge, said back wall being substantially vertical and substantially flat; and

a bottom having a front edge, a back edge, and a first and second side edge, said bottom being substantially horizontal and substantially flat;

wherein said first side edge of said front wall adjoins said distal edge of said end wall and said bottom edge of said front wall adjoins said front edge of said bottom;

18 wherein said proximal edge of said end wall adjoins
19 said first side edge of said back wall and said bottom edge
20 of said end wall adjoins said first side edge of said
21 bottom; and

22 wherein said back edge of said bottom adjoins said
23 bottom edge of said back wall.

1 2. The contoured gutter end cap according to claim 1,
2 further comprising a top wall extending substantially
3 horizontally from said top edge of said end wall.

1 3. The contoured gutter end cap according to claim 1,
2 wherein said contoured gutter end cap is fabricated from
3 metal.

1 4. The contoured gutter end cap according to claim 1,
2 wherein said contoured gutter end cap is fabricated from
3 plastic.

1 5. The contoured gutter end cap according to claim 1,
2 further having apertures dimensioned and configured for
3 setscrews.

1 6. A contoured gutter end cap, consisting of:

2 a front wall having a top edge, a first side edge, a
3 second side edge and a bottom edge, said front wall being
4 contoured to correspond to the contours of an attached
5 gutter;

6 an end wall having a top edge, a distal edge, a
7 proximal edge and a bottom edge, said end wall being
8 contoured to correspond to the contours of an attached
9 gutter;

10 a back wall having a top edge, a first side edge, a
11 second side edge and a bottom edge, said back wall being
12 substantially vertical and substantially flat; and

13 a bottom having a front edge, a first and second side
14 edge and a back edge, said bottom being substantially
15 horizontal and substantially flat;

1 wherein said first side edge of said front wall
2 adjoins said distal side edge of said end wall and said
3 bottom edge of said front wall adjoins said front edge of
4 said bottom;

5 wherein said proximal side edge of said end wall
6 adjoins said first side edge of said back wall and said
7 bottom edge of said end wall adjoins said first side edge
8 of said bottom; and

9 wherein said back edge of said bottom adjoins said
10 bottom edge of said back wall.

1 7. A contoured gutter end cap, comprising:

2 a front wall being contoured to correspond to the
3 contours of an attached gutter;

4 an end wall being contoured to correspond to the
5 contours of an attached gutter;

6 a back wall being substantially vertical and
7 substantially flat; and

8 a bottom being substantially horizontal and
9 substantially flat;

10 wherein said front wall adjoins said end wall and said
11 bottom;

12 wherein said end wall adjoins said back wall and said
13 bottom; and

14 wherein said bottom adjoins said back wall.
